

Snapshot of Our Week

Week of 9/17-9/21

We earned another 100 Bees! We decided to have a Bubblegum party! We will now work to earn 150 bees. Ask your child what he/she gets Bee cards for...

Highlight of our week

Math

In math, first graders are discovering combinations of 6-10 by using number bonds and listening to math stories. Students are also creating equations that match the stories. Next week, they will work on adding drawings to match their bonds and equations. We are busy counting and writing numbers too!

Literacy

In Reader's Workshop, first graders are learning all about book boxes called "Browsing Boxes." We learned how to be safe with them, shopped for books we are interested and are "just right" for our reading muscles and are practicing staying focused on our books in our power spots. In Writer's Workshop, we are making our pictures match our words, listening for sounds in words and using spaces.

Upcoming Events

Sept. 23 - Sukkot Begins
Oct. 19 Inservice- NO SCHOOL
Oct. 23 Early Release @ 11:30

Science

We are working hard to label and draw things exactly as we see them in our Ant Journals. We are noticing change and making predictions. We will work on making our own ant farm pictures.

At Home

Please continue to check for your child's folder every day and send it to school in the am.
A "test" email was sent out on Wednesday, please let me know if you didn't receive it and would like your email address added to our class list.
